INTERIORS TO INSPIRE

A Quick Peek Inside

We invite you to come inside and explore the design and styling for retail and restaurant destinations. Imagine the possibilities....

We can help you make it happen

WE'VE HELPED RETAIL STORES AND RESTAURANTS TRANSFORM INTO SOMETHING REALLY SPECIAL. WE HOPE YOU ARE INSPIRED BY THE IDEAS AND WE HOPE WE CAN HELP!

RUSTIC ELEGANCE

We love the way they incorporated rustic elements of logs and wood flooring, with the sophisticated and elegant high back chairs. The booth makes for great gatherings and offers flexibility in seating.

The use of stone to shape the unique chair backs gives an interesting visual experience - almost like the chairs are part of the mural.

The interior (above) flows beautifully to the outdoor space, with the use of deck boards. The casual feel and ambiance of the space are so inviting. The use of bright red table settings and apple green cups adds the perfect pop of colour.

3 | PULSE

The wood (right) wall dividers are perfect for creating privacy and giving guests a more intimate feeling. The clever use of booths and tables gives seating flexibility. The denim blue leather seats are gloriously paired with the whimsical chandeliers.

CREATIVE

The use of an old bookcase was used as a display case.

You can never go wrong with black, white and silver. The colour of the products paint the walls and shelving in the most magical way.

VERY CHIC

We don't often see salmon colour being used, but we love it! The colour complements the brick wall perfectly and creates a very warm space. The mirrors give the small cozy spot a spacious feel. The use of benches allows for more seating.

The patio lights are charming and make you feel as though you are eating outside, on the patio of some luxurious villa.

Pulse has worked with many restaurants and retailers to help make their vision come true. We offer quality construction services to business owners and entrepreneurs who are looking to build or upgrade their restaurant or retail locations. We would love to help create a space that reflects your desires.

A lot goes into creating the perfect commercial dining location. Specific regulations and codes must be followed to ensure both public and employee safety. Our team is comprised of skilled mechanics, plumbers, carpenters, commercial builders, electricians, and architects that bring the full weight of their experience to bear for each of our clients.

Your brand and image are more than just the outer look of your retail location. The internal layout, food processing stations, dining areas, ambiance, and even the sanitation stations all work together to create a total experience. We can craft custom solutions that meet the workflow needs of your employees while also creating the aesthetic you desire for your guests.

While quick project completion is always important with restaurant renovations, safety is also an equal concern. You can rest assured that when you hire our team, your renovation or new building construction work will be completed efficiently, with high quality craftsmanship and in a safe manner. We are fully insured, certified, and bonded for commercial work. We offer a wide range of services to meet the needs of retailers and restaurants large and small.
